PROFESSIONAL SUMMARY

Computer science student at Universiti Teknikal Malaysia Melaka (UTeM) with a TVET-trained, technically-practical background in software development, web application development, database systems, and cybersecurity. Solo-built a full C++ attendance and leave management system (ALMS) with role-based access control and MySQL. Developed a Java/Swing GUI ordering system (YooYoo), a PHP/MySQL QR restaurant website (Yeppeo), and a sustainability-focused VR experience in Unity. Currently undertaking FYP I on VR locomotion and motion sickness using SSQ methodology. CGPA 3.55. Available for a 24-week Industrial Training placement from 28 September 2026 to 12 March 2027.

ACADEMIC HISTORY

Bachelor of Computer Science

(Interactive Media) with Honours

Universiti Teknikal Malaysia Melaka (UTeM)

Faculty of ICT (FTMK) • TVET graduate

Current CGPA: 3.55

Expected graduation: 2027

Matriculation in Science Computer

Kolej Matrikulasi Pahang

Gambang, Kuantan, Malaysia

CGPA: 3.30

2021 – 2023

Final Year Project I (In Progress):

VR Locomotion & Motion Sickness — SSQ Study

Unity XR • C# • Simulator Sickness Questionnaire (SSQ) methodology • UTeM 2026–2027 | In Progress

- Investigating the relationship between VR locomotion methods (teleportation vs smooth locomotion) and motion sickness onset in virtual environments
- Applying SSQ methodology to measure and compare cybersickness symptoms across locomotion techniques through a structured user study
- Currently completing FYP I: proposal, literature review, methodology — FYP II commences Special Semester 2026

PROJECT EXPERIENCE

Employee Attendance & Leave Management System (ALMS)

Workshop I • UTeM • 2024 • C++ • MySQL • XAMPP • Developed entirely solo

- Solo-designed and built a full desktop system: RBAC (Admin/Manager/Employee), attendance clock-in/out, leave application & manager approval workflow, leave balance, department management, holiday management, overtime, reward leave, CSV export, and analytics
- Applied full SDLC: requirements gathering, ER diagram, C++ development, MySQL integration, unit and integration testing, and full documentation
- Security by design: three strictly separated permission levels, role-confined data access, C++ exception handling throughout

YooYoo Drinks Ordering System

Object-Oriented Programming • UTeM • 2024 • Java • Swing • MySQL • JDBC • Eclipse

- Desktop GUI system with Customer module (register, login, browse 3 categories — Milk Tea, Fruit Tea, Smoothies, customise, order, pay, membership discounts) and Staff module (CRUD menu management)
- Applied OOP: inheritance across drink class hierarchy, polymorphism, interfaces, Java Collections, exception handling; PreparedStatement for SQL injection prevention

Yeppeo Korean Restaurant QR Ordering Website

Web App Development • UTeM • 2024 • HTML5 • CSS3 • JavaScript • PHP • MySQL

- QR-code-based restaurant ordering web app — customers scan table QR code to browse menu and place orders from phone
- Mobile-first responsive front-end, PHP back-end order processing, MySQL CRUD with input sanitisation and session management

UTeM 3D Campus Walkthrough

Interactive Computer Graphics • UTeM • 2024 • C++ • OpenGL • GLUT | System Integrator & Audio

- Real-time 3D campus walkthrough: textured buildings, animated cars (trigonometric paths), dynamic lighting, collision detection, day/night cycle, interactive camera
- Role: System Integrator (merged all modules, resolved conflicts) and Audio Designer (ambient sound via Windows Multimedia API / PlaySound())

Build Tomorrow: Smart Eco-Home VR Experience

Interactive Media Authoring (BITM3223) — Final Project • UTeM • 2025 • Unity XR • C#

- Immersive VR experience exploring sustainable home living, framed around UN Sustainable Development Goals (SDG 7 Affordable & Clean Energy, SDG 11 Sustainable Cities, SDG 12 Responsible Consumption)
- Designed interactive VR environments and mechanics in Unity, building on locomotion and portal-system work from earlier assignments in the same module

Portfolio Website

Personal Project • Ongoing • HTML5 • CSS3 • JavaScript • GitHub Pages

- Self-built, actively maintained portfolio site showcasing all major coursework and personal projects, with a filterable project grid, modals, and embedded video demos — live at enchantedlucid.github.io/portfolio

ADDITIONAL PROJECTS: AR E-Book: Computer Hardware (HCI — Figma, Unity AR, user surveys) • Sustainopoly Unity Game (Project Management — Unity, UI/UX design) • Sci-Fi VR Game (Virtual Reality — Unity XR, in progress) • Parallel Short Film (Workshop II — lead editor & VFX, full merch design) • 3D Animation & Character Models (Blender — rigging, rendering) • Motion Graphics Videos (After Effects — in progress) • Digital Imaging: Mental Health Photography (Photoshop — in progress)

WORK EXPERIENCE

Account Assistant (Part-Time) | Jul 2023 – Sep 2023

Crossworld Business Strategy Sdn Bhd • WP. Kuala Lumpur • On-site

- Assisted in managing day-to-day accounting processes, including data entry, document filing, and financial recordkeeping.
- Completed tasks accurately and within deadlines, demonstrating strong attention to detail and time management.
- Adapted quickly to workplace procedures and picked up new processes efficiently through structured on-the-job learning.
- Utilised Microsoft Excel and Microsoft Word to prepare reports and organise financial data.

Brand Promoter (Part-Time)

Gadek Nursery – MAHA Event at MAEPS

- Promoted gardening products including baby trees and fertilizers to event visitors at MAHA Exhibition, MAEPS.
- Engaged with customers, explained product benefits, and supported on-site sales.
- Gained hands-on experience in customer engagement, product pitching, and event-based marketing.

Event Crew (Volunteer / Part-Time) | 2024 – 2026

Various Events (Running / Concert)

- Assisted as usher/crew at concerts and events, guiding attendees and managing entry.
- Supported event operations including registration, crowd flow, and participant coordination.
- Worked with the team to ensure smooth and organised event execution.
- Demonstrated teamwork, communication, and customer service while assisting event participants.

SKILLS

Technical Skills

- Java • C++ • Python • PHP • JavaScript
- HTML5 • CSS3 • SQL • C#
- MySQL • XAMPP • phpMyAdmin • JDBC
- Git/GitHub • Eclipse • VS Code • Sublime Text
- Unity • Unity XR • OpenGL/GLUT
- OOP • SDLC • RBAC • DB normalisation
- Secure coding • SSQ methodology • UML

Creative & Design Skills

- Adobe After Effects • Premiere Pro
- Adobe Photoshop • Illustrator
- Blender (3D modelling, animation, rendering)
- Figma • Canva • CapCut
- Motion graphics • VFX • Video editing
- UI/UX design • Branding • Print design

LEADERSHIP & CO-CURRICULAR EXPERIENCE

Vice President

Motion Graphics Final Exhibition — UTeM, 2026

- Coordinated team activities and exhibition logistics
- Managed final showcase presentation and event flow
- Recipient of the Best Technical Award for outstanding technical execution and production quality.

Project Director

Inter Practicum: Nurture The Nature — KMPH, 2022

- Led project planning, team coordination, logistics, and event execution

Committee Member

PLAY NEXT D'FTMK TECHNITY 2026 — UTeM

Exhibition Committee

Logistics & Studio — PARACOSM 2026, UTeM

Co-curriculum Activities

- Handball (Year 1)
- Volleyball (Year 1)

LANGUAGES

Malay

Native speaker — fluent in spoken and written communication

German

Beginner, ongoing self-study

English

Professional working proficiency — spoken and written

AWARDS & RECOGNITION

- Dean's List — Year 2 Semester 1, Year 2 Semester 2, Year 3 Semester 1 (3 times)
- Best Technical Award — Motion Graphics Final Exhibition, Universiti Teknikal Malaysia Melaka (UTeM), 2026
- CGPA 3.55, with a 4.00 GPA achieved in Year 2 Semester 2
- Naib Johan (Runner-up), Dodgeball — Kolej Kediaman Sports & Cultural Programme, Matriculation, 2022

SOFT SKILLS

- Debugs independently and traces issues to their root cause across C++, Java, PHP, and Python codebases
- Follows full SDLC discipline — requirements gathering, ER diagrams, testing, and complete documentation — on every project, solo or in a team
- Designs security and access control with intent, not as an afterthought (RBAC, OWASP-aligned controls, input sanitisation)
- Coordinates cross-functional teams and manages multiple parallel deliverables against fixed academic deadlines
